Klales

OFFICE OF THE ASSISTANT SECRETARY FOR
HOUSING - FEDERAL HOUSING COMMISSIONER

IN REPLY REFER TO:

NOV 6 1985

MEMORANDUM FOR: Regional Administrators
Regional Economists
Field Office Managers
Field Office Economists

SUBJECT: Approval of revised income limits for lower income and very low-income families under the Housing Act of 1937

Transmitted herewith are revised income limits for lower income and very low-income families, developed in accordance with Section 3(b)(2) of the United States Housing Act of 1937. The referenced limits, as set forth by dollar amount and family size for each Metropolitan Statistical Area (MSA), Primary Metropolitan Statistical Area (PMSA), and nonmetropolitan county in the attached State lists, are hereby approved effective this date.

These revised income limits are based on the HUD estimates of median family income for Fiscal Year 1986. As prescribed by the housing legislation, the limits for lower income families are based on 80 percent of the median income for the area, with adjustments for smaller and larger families, and the limits for very low-income families are based on 50 percent of the median, with adjustments for family size. As authorized by the legislation, adjustments also have been made for areas of unusually high or low income.

For Fiscal Year 1986, income limits have been established with consideration of the relationship between local income levels and the rental costs for existing housing. The minimum income limit for a very low-income four-person family has been set at the level at which 35 percent of income would pay the rent for a unit renting at 85 percent of the estimated typical rent for existing housing of a two-bedroom unit, based on the Section 8 Fair Market Rent standard. Setting the minimum income limits based on a rent to income ratio of 35 percent is believed to be appropriate because many nonsubsidized low-income families pay this amount or more for housing, and because households tend not to participate in assisted housing unless they are eligible for a significant subsidy. The 85 percent figure is used as a surrogate for the "penetration range" of standard quality units available in local housing markets.

—

Prior to passage of the 1981 Housing Amendments that now generally limit participation in the Public Housing and Section 8 programs to very low-income families, minimum income limits were established for lower income families based on Census Region income relationships. Minimum income limits are no longer considered necessary for the lower income limit schedules, which by statute are based on 80 percent of local median family income, because it has been determined that households at these income levels have high enough incomes to assure that they have relatively minimal need for assistance under current Section 8 program guidelines. Minimum income limits previously approved for lower income and very low-income families based on Regional income and renter household income standards will continue to apply to a small number of areas.

Consistent with the 1981 and 1983 Amendments, there will continue to be a maximum income limit for a small number of areas with unusually high incomes for which the median income value is a poor indicator of relative housing needs. The maximum income limit for a very low-income four-person family has been set at the level where 30 percent of income would pay for a unit renting at the maximum exception rents permitted by the Section 8 Existing Housing program. Based on local income and rent levels, maximum income limits for very low-income families have been established for 30 market areas, all of which are nonmetropolitan counties.

As in the past, a maximum income limit for lower income four-person families has been established at the national median family income level, which is \$27,500 for Fiscal Year 1986. The procedures for calculating maximum income limit constraints for lower income families resulted in constraining income limits for 25 metropolitan areas and 18 nonmetropolitan areas for Fiscal Year 1986.

As required by statute, adjustments have been made in the income limits for smaller and larger families by using the four-person family as a base and applying percentage adjustments for various size families as follows:

| <u>Income Limits</u> | <u>Number of Persons in Family and Percentage Adjustments</u> | | | | | | | |
|--------------------------|---|----------|----------|----------|----------|----------|----------|----------|
| | <u>1</u> | <u>2</u> | <u>3</u> | <u>4</u> | <u>5</u> | <u>6</u> | <u>7</u> | <u>8</u> |
| Lower income | 70 | 80 | 90 | Base | 106.25 | 112.5 | 118.75 | 125 |
| Very low-income | 70 | 80 | 90 | Base | 108 | 116 | 124 | 132 |

Income limits are now approved for families larger than eight persons, although they are not included in the printed State lists because of space limitations. The limits for families larger than eight persons are determined by using an adjustment of 6.25 percentage points more for each person beyond the eight-person for lower income families, and 8 percentage points more for each person beyond the eight-person for very low-income families. For example, the nine-person income limit for lower-income families is determined by multiplying the 4-person income limit by 1.3125 which is $1.25 + 6.25$. The limits developed by the use of these factors are to be rounded to the nearest \$50.

HUD Field Offices are responsible for maintaining complete and up to date records of all current income limit ceilings established for areas within their jurisdiction. Notice of all income limit revisions should be promptly distributed to program participants and Field Offices should be prepared to make income limits available to the public upon request.

If you have any questions concerning these new income limit approvals or the procedures for requesting special revisions, please contact Vince St. Clair of the Headquarters Economic and Market Analysis Division, telephone 755-5590.

*Healthy
Vagassky*

ASSISTANT SECRETARY FOR
POLICY DEVELOPMENT AND RESEARCH

IN REPLY REFER TO

OCT 21 1985

MEMORANDUM FOR: Regional Administrators
Regional Economists
Field Office Managers
Field Office Economists

FROM: June Q. Koch, Ph.D. *JQK/JB*

SUBJECT: Estimated median family incomes for Fiscal Year 1986

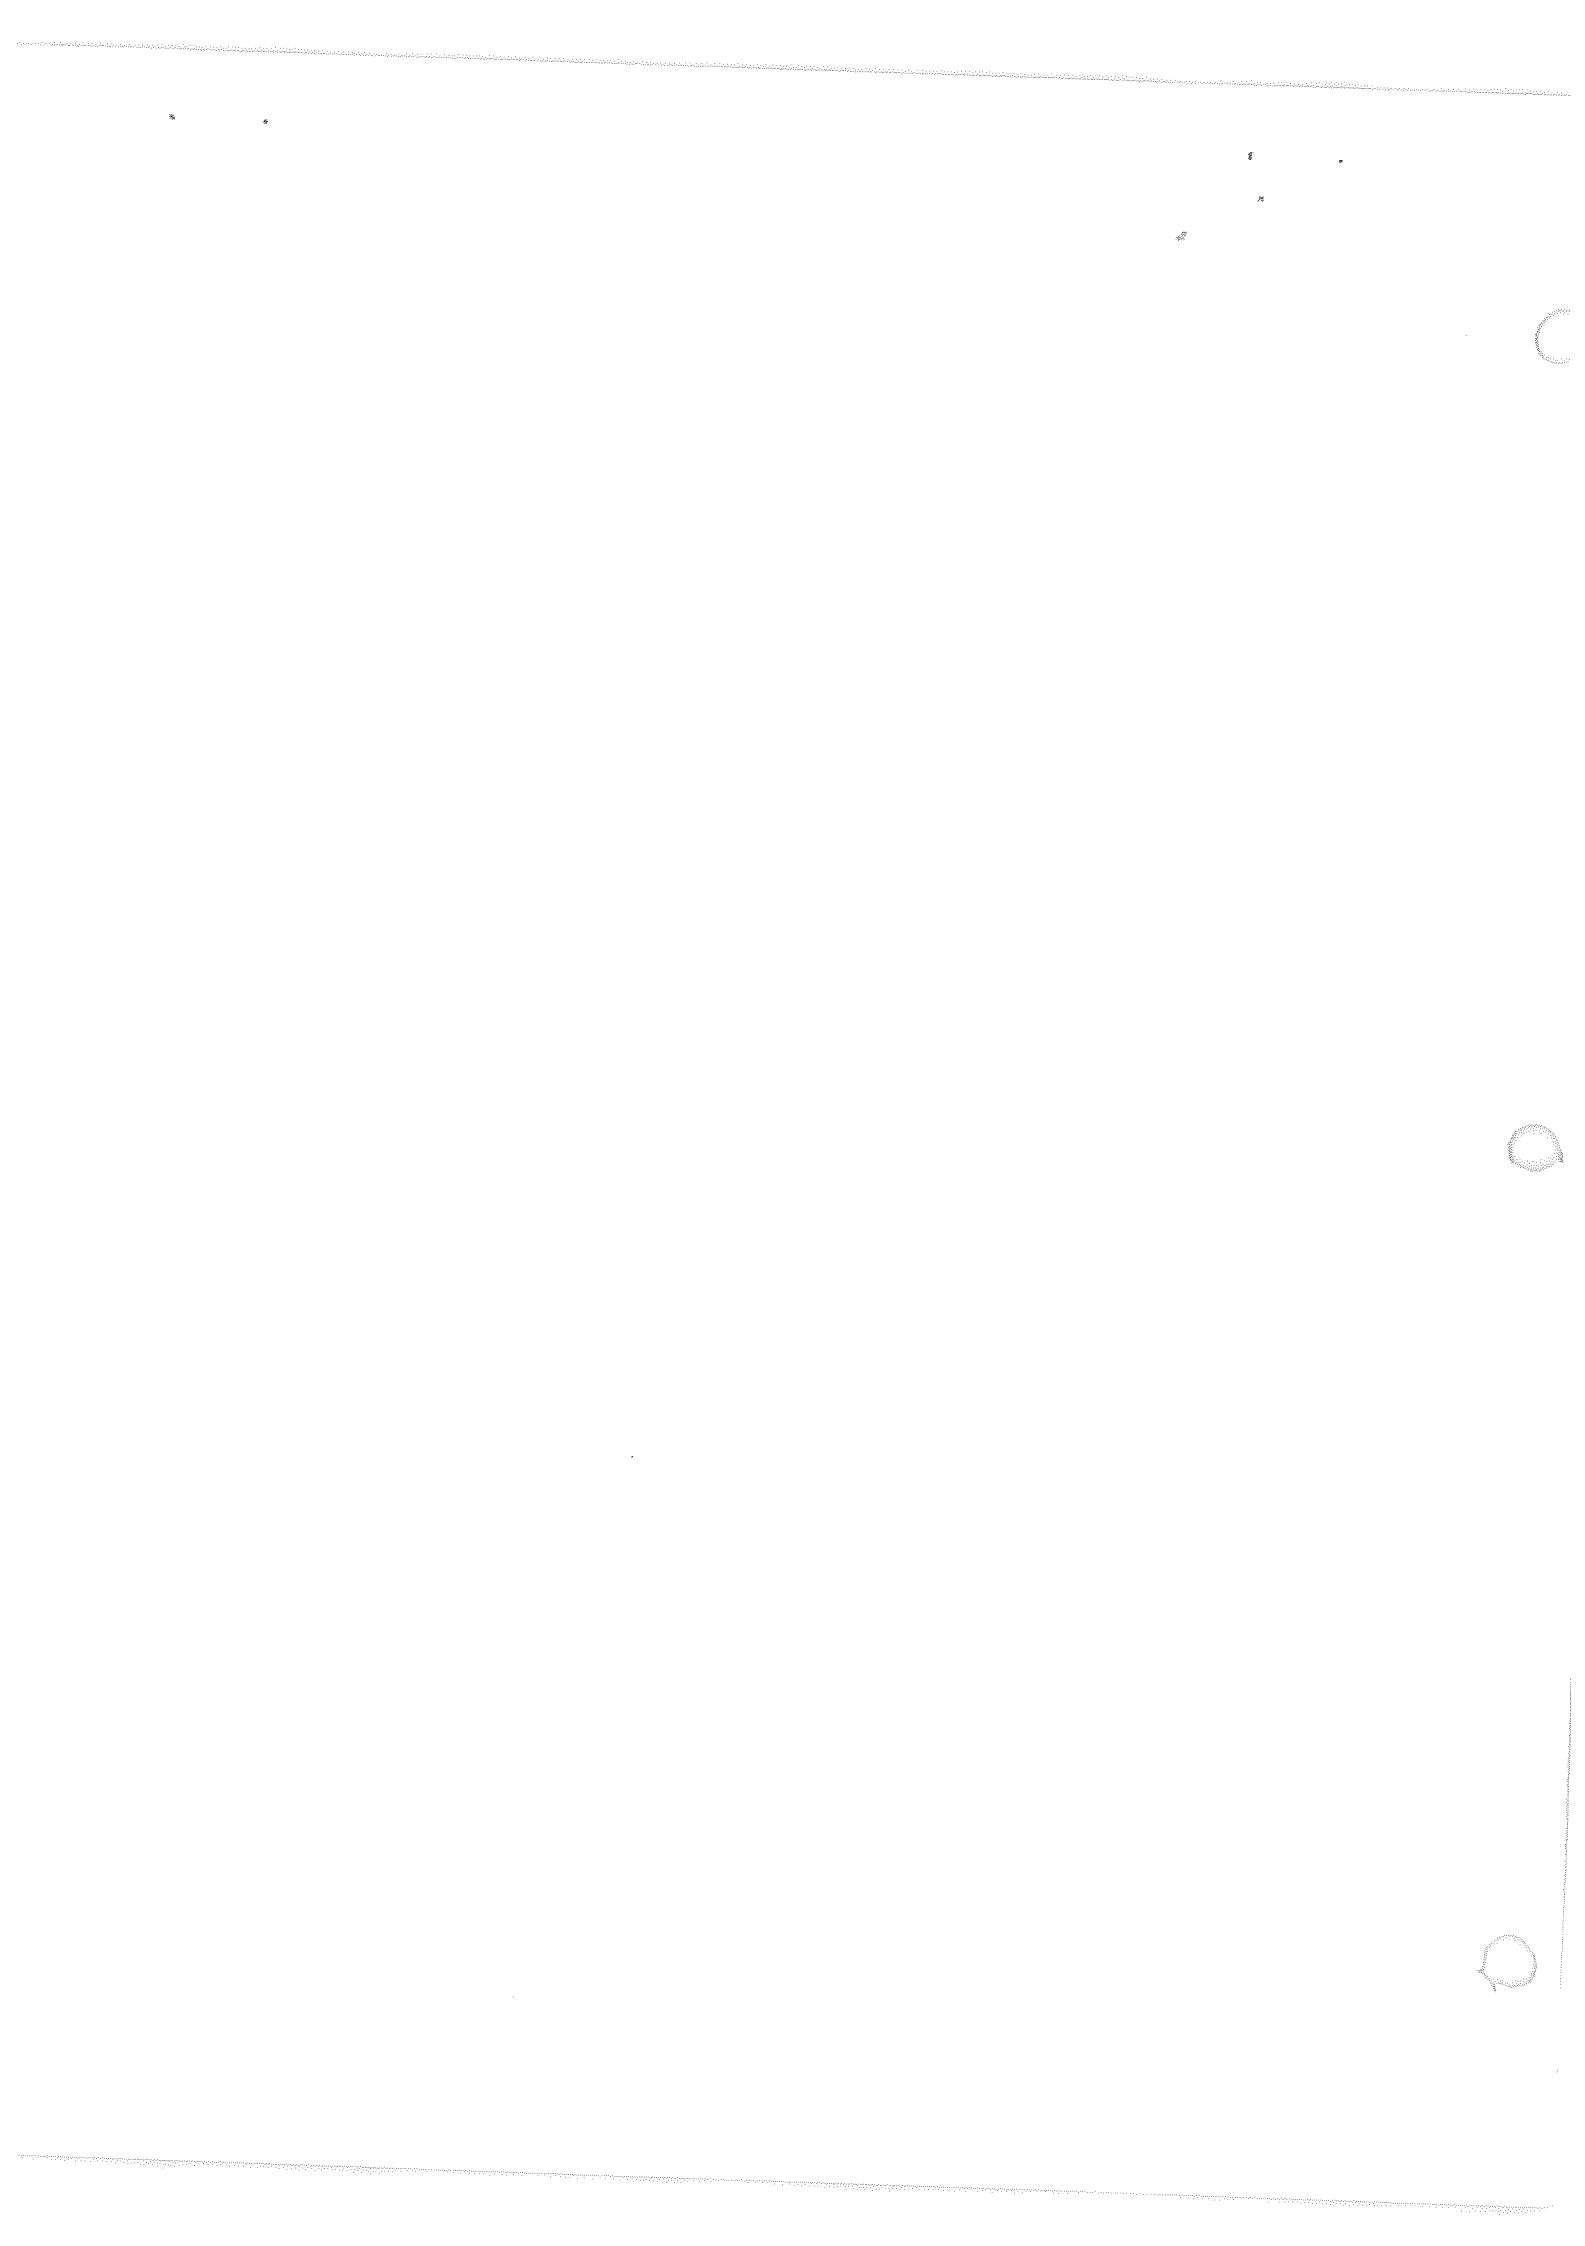

Transmitted herewith are median family income (MFI) estimates and income distributions for Fiscal Year 1986 (FY 86) covering all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs), and nonmetropolitan counties in each Field Office jurisdiction. A separate list is attached which presents the medium income estimates for States and for the metropolitan and nonmetropolitan parts of each State in the United States.

The FY 86 MFI estimates have been developed by updating the 1979 median family incomes obtained from the 1980 Census. The latest available wage data from County Business Patterns and median family income data from the Current Population Reports, P-60 Series, published by the Bureau of the Census have been used to develop these estimates as follows:

- The 1979 to 1983 change was estimated by using MSA and non-MSA county group wage data from County Business Patterns combined with Census Division median family income data from the P-60 Series. The P-60 Series data, which are highly reliable but only down to the Census Division level, are used to determine the increase in median family incomes for the nine Census Divisions. An index relating the County Business Patterns and P-60 Series data is developed to assure that the P-60 Series data are controlling. The changes in median family incomes for the individual metropolitan areas and nonmetropolitan counties are then calculated by applying the index to the County Business Patterns changes.
- An estimated average annual projected increase of 5 percent in MFI is used for 1984 and 1985, and an average increase of 3 percent is used for the first nine months of 1986 to cover the fiscal year. Use of the projected increase for the 1984 through September 1986 period is necessary because of the lag in County Business Patterns and P-60 Series data, which are not available beyond 1983.

The step by step description of the methodology used to develop the median family income estimates is attached.

2277-1

The estimated median family income for the United States for FY 1986 is \$27,500.

Please note that the use of the median family income for various HUD program applications, including income limits for subsidized housing, is subject to individual program guidelines covering definition of income and family, family size, effective dates and other factors. If there are any questions concerning the income estimates, please contact Vince St. Clair of the Headquarters Economic and Market Analysis Division. His telephone number is 755-5590.

HUD METHODOLOGY FOR ESTIMATING FY 1986 MEDIAN FAMILY INCOMES
(ECONOMIC AND MARKET ANALYSIS DIVISION, OFFICE OF ECONOMIC AFFAIRS, PD&R)

The methodology used for estimating the FY 1986 median family incomes (MFIs) for all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs), and nonmetropolitan counties is based on development of income adjustment factors for each metropolitan area and nonmetropolitan Census County Group which are used to update 1979 MFIs obtained from the 1980 Census.

The income adjustment factors are developed in several steps based on the use of individual wage earner data from County Business Patterns (CBP) which are available for 1979 through 1982, Census Division MFI from the Current Population Reports P-60 Series which is available for 1979 through 1983, and HUD income increase estimates for calendar years 1984 and 1985, and the first nine months of 1986. The step by step procedure is as follows:

- (1) The increase factors for wage increases are calculated for Census Divisions for the 1979-1982 period.

$$\frac{\text{Census Division CBP Wages (1982)}}{\text{Census Division CBP Employees (1982)}} = \text{3-year increase factor for Census Division CBP Wages}$$

$$\frac{\text{Census Division CBP Wages (1979)}}{\text{Census Division CBP Employees (1979)}} = \text{3-year increase factor for Census Division CBP Wages}$$

- (2) The increase factors for the P-60 Series median family incomes are calculated for Census Divisions for the 1979-1983 period.

$$\frac{\text{Census Division P-60 MFI (1983)}}{\text{Census Division P-60 MFI (1979)}} = \text{4-year increase factor for Census Division P-60 MFI}$$

- (3) The indices relating the County Business Patterns data to the P-60 Series data are calculated for the Census Divisions by deriving the ratios of the P-60 Series factors to the County Business Patterns factors.

$$\frac{\text{4-year increase factor for Census Division P-60 MFI}}{\text{3-year increase factor for Census Division CBP Wages}} = \text{4- to 3-year ratio of Census Division P-60 MFI to Census Division CBP Wages}$$

- (4) The increase factors for the individual metropolitan areas and nonmetropolitan counties are calculated by applying the index factors developed for the Census Divisions to the County Business Patterns data.

MSA CBP Wages (1982)
MSA CBP Employees (1982)

x 4- to 3-year ratio of Census Division P-60 MFI to Census Division CBP Wages = 4-year income adjustment factor for MSA or County Group

MSA CBP Wages (1979)
MSA CBP Employees (1979)

- (5) An average annual projected increase of 5 percent in MFI is used for calendar years 1984 and 1985, and an average increase of 3 percent is used for the first nine months of 1986 to cover the fiscal year. Use of the projected increase for the 1984 through September 1986 period is necessary because of the lag in County Business Patterns and P-60 Series data.

- (6) Calculation of the median family incomes for FY 1986 is completed by multiplying the 1979 median family income obtained from the 1980 census by the income adjustment factor derived in step (5).

NOTE: In step (4) use MSA or Census County Group data as appropriate for 1979 and 1982.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, D.C. 20410

Harris

OFFICE OF THE ASSISTANT SECRETARY FOR
HOUSING - FEDERAL HOUSING COMMISSIONER

IN REPLY REFER TO:

NOV 6 1985

MEMORANDUM FOR: Regional Administrators
Regional Economists
Field Office Managers
Field Office Economists

FROM: Janet Hale, General Deputy Assistant Secretary
for Housing-Federal Housing Commissioner, HUD

SUBJECT: Approval of revised income limits for the Section 221(d)(3) BMIR,
Section 235, and Section 236 programs

Transmitted herewith are revised income limits for determination of family eligibility under Section 221(d)(3) BMIR, Section 235, and Section 236 of the National Housing Act. The referenced limits, as set forth by dollar amount and family size in the attached State lists, are approved effective this date.

These revised income limits are based on the HUD estimates of median family income for Fiscal Year 1986. As prescribed by the housing legislation, the limits for the Section 236 program are based on 80 percent of the median income for the area, with adjustments for smaller and larger families, and the limits for the Section 235 and Section 221(d)(3) programs are based on 95 percent of the median, with adjustments for family size. The housing legislation also authorizes adjustments in the income limits for areas of unusually high or low income.

Minimum income limits for areas of unusually low income generally are not considered necessary for the Section 236 program, or the Section 221(d)(3) programs at present because it has been determined that the 80 percent and 95 percent of local median family income standards set by statute are high enough to include virtually all lower income families that have more than minimal need for housing assistance. Minimum income limits based on previously approved guidelines will continue to apply to a small number of areas. In accordance with established procedures, Field Offices may request modified Section 235 income limits for specific market areas where warranted by local construction costs.

For areas of unusually high income, a maximum income limit has been established at \$27,500 for the Section 236 program, and \$32,700 for the Section 221(d)(3) BMIR and Section 235 programs, applicable to the four-person family. For areas where Section 235 income limits have been approved on the basis of local cost data, the maximum limits may be higher.

As required by statute, adjustments have been made in the income limits for smaller and larger families by using the four-person family as a base and applying percentage adjustments for various size families as follows:

| <u>Income Limits</u> | Number of Persons in Family and Percentage Adjustments | | | | | | | |
|--------------------------|--|----|----|------|--------|-------|--------|-----|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Lower income | 70 | 80 | 90 | Base | 106.25 | 112.5 | 118.75 | 125 |
| Very low-income | 70 | 80 | 90 | Base | 108 | 116 | 124 | 132 |

Income limits are now approved for families larger than eight persons, although they are not included in the printed state lists because of space limitations. The limits for families larger than eight persons are determined by using an adjustment of 6.25 percentage points more for each person beyond the eight-person for lower income families, and 8 percentage points more for each person beyond the eight-person for very low-income families. For example, the nine-person income limit for lower-income families is determined by multiplying the 4-person income limit by 1.3125 which is $1.25 + 6.25$. The limits developed by the use of these factors are to be rounded to the nearest \$50.

HUD Field Offices are responsible for maintaining complete and up to date records of all current income limit ceilings established for areas within their jurisdiction. Notice of all income limit revisions should be promptly distributed to program participants and Field Offices should be prepared to make income limits available to the public upon request.

If you have any questions concerning these new income limit approvals or the procedures for requesting special revisions, please contact Vince St. Clair of the Headquarters Economic and Market Analysis Division, telephone 755-5590.

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, D.C. 20410-6000

Rec'd 2/11/87

OFFICE OF THE ASSISTANT SECRETARY
FOR POLICY DEVELOPMENT AND RESEARCH

FEB 6 1987

MEMORANDUM FOR: Regional Economists
Field Office Economists

FROM: David E. Shenk, Director, Economic and Market Analysis
Division, TEE *David E. Shenk*

SUBJECT: Transmittal of FY 1987 Income Limits and Estimates of
Median Income

Revised income limits for the Section 8 and Section 235, Section 236, and Section 221(d)(3)(BMIR) programs were approved on February 6, 1987. Attached with this memo you should find:

- Revised lower and very low income limits
- Revised estimates of median family income for states and areas
- Revised Section 235, Section 236, and Section 221(d)(3)(BMIR) income limits
- Signed and dated copies of the associated transmittal memoranda
- Income limit area definitions with listings of metropolitan area county components by State
- An income limits methodology and briefing paper

You are responsible for providing copies of the income limits, the transmittal memoranda, and the area definitions for your jurisdiction to your CPD and Housing staff. They, in turn, are responsible for distributions to client organizations.

The Congress recently tied eligibility for tax-exempt mortgage revenue bonds, tax-exempt multifamily rental housing bonds, and lower income tax credits to HUD income limits, so there will be more requests than usual for these numbers. It is our understanding that the Treasury Department's intention is that all tax code related income numbers should be based on HUD's very low income limits rather than the estimate of area median family income. Thus, for instance, 115 percent of area median income has been defined as 2.3 times the four-person very low income limit. You should advise callers that, if their inquiry is tax code related, our understanding is that they should use HUD's very low income limits as the basis for calculating the income percentages referred to in tax code legislation. Callers with questions on this matter should be advised to contact the Treasury Department.

We have set up a new procedure for responding to inquiries on income information from members of the public. As in the past, you should continue to provide income limits and median incomes requested for areas within your jurisdiction. If numbers for an area outside your jurisdiction are requested, you should refer the caller to HUD USER. HUD USER will answer telephone inquiries for income data for one area, and sell income limits or estimates of median income for all counties in a State or the Nation. Credit card sales will be accepted. HUD USER's toll-free number is 1-800-245-2691 (use 301-251-5154 in the Washington metropolitan area).

Please call Joe Riley on 755-5590 or Sue Miller on 755-5577 if you have any questions on these matters.

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, D.C. 20410-8000

OFFICE OF THE ASSISTANT SECRETARY FOR
HOUSING-FEDERAL HOUSING COMMISSIONER

FEB 6 1987

MEMORANDUM FOR: Regional Administrators
Regional Economists
Field Office Managers
Field Office Economists

SUBJECT: Approval of revised income limits for lower income and very low-income families under the Housing Act of 1937

This memorandum transmits revised income limits for lower income and very low-income families, developed in accordance with Section 3(b)(2) of the United States Housing Act of 1937. These income limits, which are listed by dollar amount and family size, are available for each Metropolitan Statistical Area (MSA), Primary Metropolitan Statistical Area (PMSA), and nonmetropolitan county in the attached lists. The revised limits are effective as of the date of this memorandum.

These revised income limits are based on the HUD estimates of median family income for Fiscal Year 1987. As required by statute, the definition of "lower income family" is based on 80 percent of the median income for the area, with adjustments for smaller and larger families, and the "very low-income family" income limits are based on 50 percent of the median, with adjustments for family size. As authorized by the legislation, adjustments also have been made for areas of unusually high or low income or housing costs in the same manner as last year. Minimum income limit standards were used to increase income limits in areas with unusually high rental housing cost to income relationships. Maximum income limit standards were used to constrain income limits in areas with unusually high incomes.

The minimum income limit for a very low-income four-person family has been set at the level at which 35 percent of income would pay the rent for a unit renting at 85 percent of the estimated typical rent for an existing two-bedroom unit, as measured by the Section 8 Fair Market Rent standard. A 35 percent rent-to-income ratio was selected for use in setting minimum income limits because many nonsubsidized low-income families pay this amount or more for housing, and because households tend not to participate in assisted housing programs unless they are eligible for a significant subsidy. The 85 percent figure represents the lowest rent range at which a supply of standard quality units is normally available.

Minimum income limits are not considered necessary for the lower income limit schedules, which by statute are based on 80 percent of local median family income. Households at these income levels have high enough incomes to ensure that they have relatively limited need for assistance

O

O

O

under the current Section 8 program standards. Minimum income limits previously approved for lower income and very low-income families based on Regional income and renter household income standards will continue to apply to a small number of areas until increases in area income levels produce higher income limits using current procedures.

As in the past, a maximum income limit for lower income four-person families has been established at the national median family income level, which is \$30,400 for Fiscal Year 1987. Use of this procedure resulted in constraining income limits for lower income families in 18 metropolitan areas and 16 nonmetropolitan areas.

There continues to be a small number of areas with unusually low rental housing costs in relationship to area median family incomes. To adjust for these situations, the maximum income limit for a very low-income four-person family has been set at the level at which 30 percent of income would pay for a unit renting at the maximum exception rent permitted by the Section 8 Existing Housing program. Use of this procedure resulted in constraining income limits for very low-income families in 45 market areas, all of which are nonmetropolitan counties.

As required by statute, adjustments have been made in the income limits for smaller and larger families by using the four-person family as a base and applying percentage adjustments for various size families as follows:

| <u>Income Limits</u> | <u>Number of Persons in Family and Percentage Adjustments</u> | | | | | | | |
|--------------------------|---|----------|----------|----------|----------|----------|----------|----------|
| | <u>1</u> | <u>2</u> | <u>3</u> | <u>4</u> | <u>5</u> | <u>6</u> | <u>7</u> | <u>8</u> |
| Lower income | 70 | 80 | 90 | Base | 106.25 | 112.5 | 118.75 | 125 |
| Very low-income | 70 | 80 | 90 | Base | 108 | 116 | 124 | 132 |

Higher income limits apply to families with more than eight persons, although they are not included in the printed State lists because of space limitations. The lower income limits for families larger than eight persons are determined by adding 6.25 percent of the four-person income limit base to the eight-person limit for each person in excess of eight. For very low income limits, eight percent of the four-person base is added to the eight-person limit for each person in excess of eight. (e.g., the nine-person very low limit equals 1.4 ($1.32 + .08$) times the four-person limit. The limits developed by the use of these factors are to be rounded to the nearest \$50.

HUD Field Offices are responsible for maintaining complete and up to date records of all current income limit ceilings established for areas within their jurisdiction. Notice of all income limit revisions should be promptly distributed to program participants, and Field Offices should be prepared to make income limits available to the public upon request.

0

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, D.C. 20410-8000

OFFICE OF THE ASSISTANT SECRETARY FOR
HOUSING-FEDERAL HOUSING COMMISSIONER

FEB. 6 1987

MEMORANDUM FOR: Regional Administrators
Regional Economists
Field Office Managers
Field Office Economists

FROM: *Thomas J. Demery*, Assistant Secretary for Housing-Federal Housing
Commissioner, H

SUBJECT: Approval of revised income limits for the Section 221(d)(3) BMIR,
Section 235, and Section 236 programs

This memorandum transmits revised income limits for determination of family eligibility under Section 221(d)(3) BMIR, Section 235, and Section 236 of the National Housing Act. These income limits, which are listed by dollar amount and family size, are available for each Metropolitan Statistical Area (MSA), Primary Metropolitan Statistical Area (PMSA), and nonmetropolitan county. The revised income limits become effective as of the date of this memorandum.

These revised income limits are based on the HUD estimates of median family income for Fiscal Year 1987. As required by legislation, the limits for the Section 236 program are based on 80 percent of the median income for the area, with adjustments for smaller and larger families, and the limits for the Section 235 and Section 221(d)(3) programs are based on 95 percent of the median, with adjustments for family size. As authorized by legislation, adjustments also have been made for areas of unusually high or low income in the same manner as last year.

No new adjustments were made to increase income limits due to unusually low incomes because the Department has determined that the 80 percent and 95 percent of local median family income statutory standards are high enough to include virtually all lower income families that have more than minimal housing assistance needs. There will continue to be a small number of areas where minimum income limits based on previously approved guidelines will remain in effect. In accordance with established procedures, Field Offices may request modified Section 235 income limits for specific market areas where warranted by local construction costs.

For areas of unusually high income, the four-person family maximum income limit has been established at the national median family income level of \$30,400 for the Section 236 program. The maximum has been set at \$36,100 for the Section 221(d)(3) BMIR and Section 235 programs to maintain the 80 to 95 percent statutory relationship. For areas where Section 235 income limits have been approved on the basis of local cost data, the maximum limits may be higher.

As required by statute, adjustments have been made in the income limits for smaller and larger families by using the four-person family as a base and applying percentage adjustments for various size families as follows:

| Number of Persons in Family and Percentage Adjustments | | | | | | | |
|--|----|----|------|--------|-------|--------|-----|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| 70 | 80 | 90 | Base | 106.25 | 112.5 | 118.75 | 125 |

Higher income limits apply to families larger than eight persons, although they are not included in the printed state lists because of space limitations. The limits for families larger than eight persons are determined by using an adjustment of 6.25 percentage points more for each person beyond the eight person. For example, the nine-person income limit is determined by multiplying the 4-person income limit by 1.3125 (i.e., the eight-person limit of 125 percent plus 6.25 percent for an additional family member. The limits developed by the use of these factors are to be rounded to the nearest \$50.

HUD field Offices are responsible for maintaining complete and up to date records of all current income limit ceilings established for areas within their jurisdiction. Notice of all income limit revisions should be promptly distributed to program participants and Field Offices should be prepared to make income limits available to the public upon request.

If you have any questions concerning these new income limit approvals or the procedures for requesting special revisions, please contact Joseph Riley of the Headquarters Economic and Market Analysis Division, telephone 755-5590.

Overview of
HUD Section 8 & Public Housing Income Limits

- Section 3 of the U.S. Housing Act of 1937 contains the following provisions related to income limits:
 - "Lower income families" are defined as families whose incomes do not exceed 80 percent of the median family income for the area.
 - "Very low-income families" are defined as families whose incomes do not exceed 50 percent of the median family income for the area.
 - Income limits must be adjusted for family size.
 - Income limits may be adjusted for areas with unusually high or low family income or housing cost to income relationships.
 - The Secretary of Agriculture must be consulted prior to establishing income limits for rural areas, since these limits also apply to certain Farmers Home Administration programs.
- Section 16 of the U.S. Housing Act of 1937 contains the following additional provisions:
 - At least 95 percent of the dwelling units which first became available for occupancy under either program on or after October 1, 1981, must be leased to very low-income families, and at least 75 percent of the units available prior to October 1981 must be leased to very low-income families.
 - HUD calculates area median family income levels (one-person households and households consisting of unrelated individuals are excluded from these calculations) for 339 metropolitan areas and 2419 nonmetropolitan areas.
 - Median family income estimates are based on decennial Census data updated with Bureau of the Census P-60 income data and Department of Commerce County Business Patterns employment and earnings data.
 - Two procedures are used to minimize year-to-year fluctuations in estimates. One is to maintain median income estimates and income limits at the previous year's levels for areas where they would decrease if based solely on the most current data. The other is to cap increases at ten percent. The cap is exceeded only if two or more years of data show that a higher increase is warranted.

0

0

0

- Comparisons of HUD estimates of median area incomes with 1980 Census data provide an indication on estimation accuracy over the 1970-80 period, during which incomes changed by over 100 percent:
 - The population-weighted average standard error was 6 percent.
 - Seven percent of metro areas and about 30 percent of nonmetro areas had estimate errors in excess of 10 percent.
 - Errors were highest for nonmetro counties with populations of less than 5,000 persons and of unusually low income.

Family Size Adjustments:

- Income limits for very-low and lower income 4-person families are normally calculated by taking 50 percent and 80 percent, respectively, of the area median income.
- Income Limit Adjustments for varying family sizes are made as follows:

| <u>Number Persons in Family</u> | | | | | | | | |
|--|----------|----------|----------|----------|----------|----------|----------|------|
| <u>1</u> | <u>2</u> | <u>3</u> | <u>4</u> | <u>5</u> | <u>6</u> | <u>7</u> | <u>8</u> | |
| Very low-income limit: (50% of median or adj. median=100%) | 70% | 80% | 90% | 100% | 108% | 116% | 124% | 132% |
| Lower income limit: (80% of median or adj. median=100%) | 70% | 80% | 90% | 100% | 106.25% | 112.5% | 118.75% | 125% |

Adjustments for Areas With Unusual Incomes or Housing Costs:

- HUD has always adjusted income limits for areas of unusually high or low income; since 1983 the 4-person lower income limit for an area has been "capped" at the U.S. median family income level, and in 1983 and 1984 a 4-person Very Low Income Limit "ceiling" was set at 80 percent of the U.S. median renter household income level.
- Consistent with current legislation, the FY 1986 and 1987 income limit calculations take into consideration income to housing cost relationships to define areas of unusually high or low income. The method used has almost no affect on lower income limits, but modifies how very low-income limits are set in a manner more consistent with program objectives.

C

O

O

- The methods used to calculate minimum and maximum income limits for areas of unusually high or low income or housing costs are as follows:

| | <u># MSAs Affected</u> | <u># Non-Metro Counties Affected</u> |
|--|---------------------------------|--|
| <u>For Very Low Income Limits based on 50% of area median income:</u> | | |
| - The minimum is set at the income level at which 35 percent of a 4-person family's income would pay for a unit renting at 85 percent of the 2-bedroom FMR* | 46 | 408 |
| - The maximum is set at the income level at which 30 percent of a 4-person family's income would pay for a unit renting at 120 percent of the 2-bedroom FMR** | 0 | 45 |
| <u>For Lower Income Limits based on 80% of area median income:</u> | | |
| - The minimum is set at the Very Low Income Limit level if it would otherwise be lower | 6 (all are in U.S. territories) | 5 |
| - The maximum for a 4-person family is set at the U.S. median family income level of \$30,400 | 18 | 16 |
| - These method of calculating limits for areas with unusually high or low incomes or housing costs have the following effects: | | |
| <ul style="list-style-type: none"> - Less than 10 percent of the population resides in areas in which income limit minimums or maximums apply. - Forty-six of 339 metro areas have higher Very Low-Income Limits than would otherwise occur because rental housing costs are unusually high relative to income levels. | | |

* 85 percent of the Section 8 Existing FMR is the lowest rent range at which a reasonable supply of standard units is normally available.

** There is a statutory constraint that adjustments may not result in FMRs in excess of 120 percent of published FMRs.

- Three non-metro areas in Alaska have higher Lower Income Limits as a result of the new policy, because their Very Low-Income Limits would otherwise exceed their Lower Income Limits. The other areas affected by this policy are in Puerto Rico and U.S. trust territories.
- For HUD housing programs, Very Low Income Limits are much more relevant than Lower Income Limits because:
 - The 30 percent rent to income ratio makes assisted housing unattractive to most households with incomes above 65 percent of area median family income.
 - There are strict statutory limits on program participation by those not of Very Low Income; the net effect of the 1981 and 1983 Amendments is to restrict most program participation to households of Very Low Income.
- The Farmers Home Administration and several State housing finance agencies are directed by legislation to use HUD's Lower Income Limits, but the relevant HUD legislation governing income limit adjustments related only to factors influencing the Public Housing and Section 8 programs.

Attachment 2

EXCERPTS FROM
HOUSING ACT OF 1937

Section 3 (2) The term "lower income families" means those families whose incomes do not exceed 80 per centum of the median income for the area, as determined by the Secretary with adjustments for smaller and larger families, except that the Secretary may establish income ceilings higher or lower than 80 per centum of the median for the area on the basis of the Secretary's findings that such variations are necessary because of prevailing levels of construction costs or unusually high or low family incomes. The term "very low-income families" means lower income families whose incomes do not exceed 50 per centum of the median family income for the area, as determined by the Secretary with adjustments for smaller and larger families, except that the Secretary may establish income ceilings higher or lower than 50 per centum of the median for the area on the basis of the Secretary's findings that such variations are necessary because of unusually high or low family incomes. Such ceilings shall be established in consultation with the Secretary of Agriculture for any rural area, as defined in section 520 of the Housing Act of 1949, taking into account the subsidy characteristics and types of programs to which such ceilings apply.

Sec. 16 (a) Not more than 25 per centum of the dwelling units which were available for occupancy under public housing annual contributions contracts and section 8 public housing assistance payments contracts under this Act before the effective date of the Housing and Community Development Amendments of 1981, and which will be leased on or after such effective date shall be available for leasing by lower income families other than very low-income families.

(b) Not more than 5 per centum of the dwelling units which become available for occupancy under public housing annual contributions contracts and section 8 housing assistance payments contracts under this Act on or after the effective date of the Housing and Community Development Amendments of 1981 shall be available for leasing by lower income families other than very low income families.
